COMIREX-M-102

27 July 1970

25X1

Photographic Reconnaissance

1. The Chairman explained this special limited meeting of COMIREX members and consultants had been called to evaluate and prepare a paper on the present outlook for satellite coverage of the area west of [] and the alternative means of supplementing satellite coverage with photo reconnaissance from other platforms. The Committee's report was required by 1000 hours, Wednesday, 29 July.

2. [] proposed that the Committee proceed to ascertain and discuss the data required for the paper on the following points: the present satellite schedule; accessibility to the area of interest; utility of photography of various resolution and obliquity; and the capabilities and availability of each of the other overhead imagery collection platforms to provide coverage. Following detailed discussion and general agreement on the pertinent data elements to be included, the Chairman and COMIREX Staff undertook to prepare the actual draft report after the meeting. [] invited any who wished to stay to do so. The resulting paper would be reproduced overnight and copies sent via LDX to COMIREX members first thing in the morning. [] dated 28 July 1970, was issued at opening of business, 29 July 1970. Copies were LDX'd to COMIREX Members. Later on 29 July 1970 certain pages of the original memorandum were revised slightly and new distribution to members and named recipients accomplished. /
